

GETTING STARTED AS A NEW PROGRAM SPONSOR

1

University Rule:

The Texas A&M University Rule for Campus Programs for Minors (24.01.06.M1) outlines the requirements for compliance. We highly encourage all program sponsors to read through this rule, however it is especially important for first time program sponsors to review the rule. The rule outlines the requirements for hosting campus programs for minors.

2

Log in with NetID/Create a New Account:

Program Sponsors can access the CPM Application portal on the homepage of the CPM website (CPM.tamu.edu). Once a program sponsor gets to the CPM Application portal, they will need to log in, using one of two ways:

- Texas A&M students, staff, or faculty will select the "Log in with NetID" button on the right half of the screen and go ahead and log in with their NetID and password.
- For those who do not have a NetID or a camps account yet, choose to "Create New Account". Those program sponsors will create a camps account, then will log in with your camps account and password on the left side of the log in screen in the future.

3

Meet with University Youth Programs:

Once program sponsors are logged in, they will not be able to start a new application or review past applications immediately! Every program sponsor will need to be given access to their specific program. To gain access, program sponsors will need to meet with University Youth Programs, so that we can:

- add the program sponsor to an existing CPM Program that is in the CPM Application system, or
- create a new CPM Program in the CPM Application system, if this is a first time program, and add the program sponsor to this system, and
- review the requirements outlined in the CPM University Rule and answer any questions program sponsors may have.
